A detailed black and white illustration of a vintage mechanical device, likely a typewriter or a small press. It features a large, horizontal roller or cylinder in the center, with a handle or lever on the right side. The device is mounted on a sturdy base with four legs. A small, circular component, possibly a lens or a light source, is visible on the right side. The overall design is intricate and suggests a complex mechanical function.

## FOLDING TYPEWRITER

-an efficient little six-pound typewriter which takes all the mon-  
 ey and illegibility out of writing. With a CORONA you can  
 handle your business correspondence anywhere-in the office, on the  
 train, or at home. The CORONA is not a toy, nor an experiment;  
 and we can prove to you that it is the
